Professional Summary

Software Engineer and Full-Stack Developer with practical experience in MERN stack development, React, Node.js, Express.js, C#, Python, PHP, SQL Server, MongoDB, and MySQL. Experienced in developing responsive web applications, RESTful APIs, database-driven systems, and user-focused interfaces. Strong interest in Artificial Intelligence, software engineering, and modern web application development.

Education

MSc in Artificial Intelligence

Present

Kingston University, UK / ESOF Metro Campus

- Developing expertise in Artificial Intelligence, Machine Learning, Data Analysis, Intelligent Systems, and modern AI technologies.

BEng (Hons) in Software Engineering — First Class

2025–2026

London Metropolitan University, UK / ESOF Metro Campus

- Studied Software Development, Application Development, Advanced Software Engineering, Artificial Intelligence, Project Analysis and Practice, System Design, and practical project development.

Higher National Diploma in Software Engineering

2023–2025

IDM Achievers International Campus Limited

- Developed practical knowledge in Software Development, Programming, Database Management, Web Development, System Analysis, and SDLC methodologies.

Diploma in Information Technology

2022

IDM Achievers International Campus Limited

- Covered IT fundamentals, Programming, Networking, Database Management, Computer Systems, and Web Technologies.

Diploma in English

2022

IDM Achievers International Campus Limited

- Developed English language, professional communication, grammar, writing, reading, and presentation skills.

Professional Experience

Full-Stack Developer

2025–2026

District Transfer Management System — Ampara Divisional Secretariat

- Developed a MERN-based District Transfer Management System for managing employee transfer applications and workflow processes.
- Designed responsive front-end interfaces using React and JavaScript with mobile-friendly application workflows.
- Developed RESTful APIs using Node.js and Express.js, implementing CRUD operations, authentication, validation, business logic, and MongoDB data management.

Front-End Developer

2025

Cybtrix (Pvt) Ltd

- Built responsive React interfaces using Tailwind CSS, HTML, and JavaScript.
- Developed user-focused and mobile-responsive web interfaces.

- Developed a responsive web application with product display, ordering, and feedback functionality.
- Implemented interactive front-end components and application features.

Selected Projects

MediTrack — AI-Powered Medication Reminder and Tracking System

- Developed a MERN-based medication reminder and tracking system with smart scheduling, dose tracking, adherence monitoring, and voice notifications.

District Transfer Management System — Government Project

- Developed a MERN-based system for the Ampara Divisional Secretariat to streamline employee transfer applications and workflow management.

SaleMart — Sales Distribution System

- Developed a sales distribution system supporting orders, inventory, billing, and delivery tracking using React, FastAPI, and SQL.

UniManage — University Course Management System

- Developed a university course, enrollment, and grading management system using ASP.NET MVC, C#, and SQL Server.

StudySphere — AI Chatbot

- Developed a multilingual AI-powered academic assistant using React, Flask, and MySQL for student academic support.

Rose Bouquet — Flower Shop Website

- Developed a dynamic full-stack flower shop website using HTML, CSS, JavaScript, and PHP.

Research & Academic Work

Amazon E-Commerce Expansion and Its Potential Impact on Sri Lankan Businesses

- Examined Amazon's global e-commerce expansion and its potential impact on Sri Lankan businesses, retailers, and consumers.
- Analysed opportunities and challenges related to digital commerce, competition, consumer behaviour, logistics, and online retail growth in Sri Lanka.

Environmental Impact of Smartphone Use Among Teenagers

- Researched smartphone production, energy consumption, electronic waste, disposal practices, and their environmental impact.
- Examined responsible usage, extended device lifecycles, reuse, and recycling as approaches to reducing electronic waste.

Technical Skills

Programming: JavaScript, C#, Python, PHP, HTML5, CSS3; React.js, Bootstrap, Tailwind CSS.
Backend & APIs: Node.js, Express.js, FastAPI, ASP.NET MVC; RESTful APIs, API Integration, Authentication.
Databases: MongoDB, SQL Server, MySQL; Database Design, SQL, CRUD Operations, Data Modelling.
Artificial Intelligence: Artificial Intelligence, Machine Learning Fundamentals, AI Chatbot Development, NLP Concepts.
Software Engineering: OOP, SDLC, System Analysis, System Design, UML, Agile, Testing, Debugging.
UI/UX Design: Figma, Wireframing, Prototyping, Usability, Responsive Design, Accessibility.
Development Tools: Visual Studio, VS Code, Postman, MongoDB Compass, SSMS, npm.
Version Control: Git, GitHub, Repository Management, Branching, Merging, Pull Requests.
